

Build it Live with **IBM BIGFIX**

Monday February 11, 2019 from 1:30 – 5:30 PM | Emeryville, California

Learn the different parts of the BigFix platform and how they fit together to form a complete, start-to-finish solution through a Live Development and Demo

Presented by James Stewart (JGSTEW) and the BigFix Development Team

DETAILS

• AGENDA

Will cover Fixlet Debugger, Analyses, Fixlets, Actions, Offers, Presentation Debugger, Web Reports, Dashboards, REST API

• DEVELOPMENT TEAM

Direct contact with the BigFix development team in Emeryville

• NO ENTRANCE FEE

Session will be held at HCL Emeryville and follows the IBM THINK Global BigFix User Group in San Francisco

• REGISTRATION

See registration link for details including commuting and travel options to our Emeryville headquarters

BUILDING SOLUTIONS IN REAL-TIME

to improve and simplify your work

The BigFix Development Team will lead the end-to-end development of a basic but complete BigFix solution. During this event attendees will not only be introduced to the tools used to create BigFix content such as Fixlets, Tasks, Analyses and Dashboards, but they will also watch them built and used in a demo environment.

Attendees will gain a better understanding of our content model and Session and Client Relevance and be introduced to tools available for facilitating development of solutions on top of the BigFix platform. The intended result is a small BigFix solution that can be used or tweaked in attendees' own environment.
